

CAMPAIGN AWARENESS OF STERILIZATION

MY NAME IS ZAN... I was born in Mykonos...

I am very happy, because I have shown some human that stray cats and dogs need to be helped from being poisoned as this happens in my country at the end of each touristic season.

In our case, sterilization and castration is the best solution to avoid our multiplication in a uncontrollable way. I have been castrated, thanks to the friends of Life Rescue Around the World.

Campaign awareness of sterilization

This November 2007 a Mykonos' veterinary, Kostas Keramidas, will operate a 100 of my fellow mates, with the goal to sensitize the local people, letting them know this is the best constructive way to create a balance between us and humans.

The Sterilization Campaign, will continue through the help of the local organization Animals Friends of Mykonos.

Naturally, money/funds are needed to finance the surgeries. With 40 Euros a male cat can be castrated and with 60 Euros a female cat can be sterilized. To support this initiative, does not only mean to rescue/save stray cats and dogs of Mykonos but also contribute to develop a sense of Oness/Union among all Living Beings in a mutual respect.

Thanks!
